

# Latest opportunities and challenges in the current regulation

Jan Wicher Krol, policy advisor Skal Biocontrole

# Challenge: EU Organic Regulation 2018/848

Regulation (EU) 2018/848				
	Production Rules	Control Rules	Trade Rules	
Delegated Acts	2020/1794 Seeds & PRM	2021/771 Traceability and mass balance during inspection Controls of OGG	2021/1342 CB recognition in third country	
	2020/2146 Exceptional production rules		2021/1697 Conditions for CB recognition	
	2020/427 + 2021/269 Detailed production rules	2021/715 OGG-ICS rules	2021/1698 Requirements for recognition of CB and their supervision	
	2021/716 Prod. Rules sprouted seeds, chicory heads, aquaculture	2021/1691 Operator Recordkeeping	2021/2305 Conditions under which products are exempt from official controls	
	2021/642 Labeling of organic products	2021/1006 Model of UE certificate	2021/2306 COI template, issuance and verifications	
	2021/1189 PRM Marketing	2021/2304 Certificate of non-use of antibiotics on organic animal products		
	2021/1691 Amendment annex II 2018/848			
	2022/474 Production and use of non-organic, in conversion, organic seedling			
	Implementing Acts	2020/464 + 2020/2042 field recognition of conversion period	2021/279 Suspicion of noncompliance Investigation Labeling requirements OGG size and records, ICS management % of control and sampling Exchange of information	2021/1378 Template Certificate of conformity and list of recognized CB
		2021/1165 Annexes of substances authorised		2021/2307 Rules on documentation and notification requirements for import
2020/1693 Report of dates		2021/2119 Records and declaration required by the operator and technical means for issuance of certificate	2021/2325 List of third countries and the list of recognised inspection authorities and bodies	

## Opportunities

- Member States can exclude low-risk operators from the annual physical inspection obligation and allow a visit every 24 months – not applicable in Third Countries!
- More harmonisation for risk assessment (10 elements!)
- Catalogue of measures (Member State)

# Challenges and opportunities

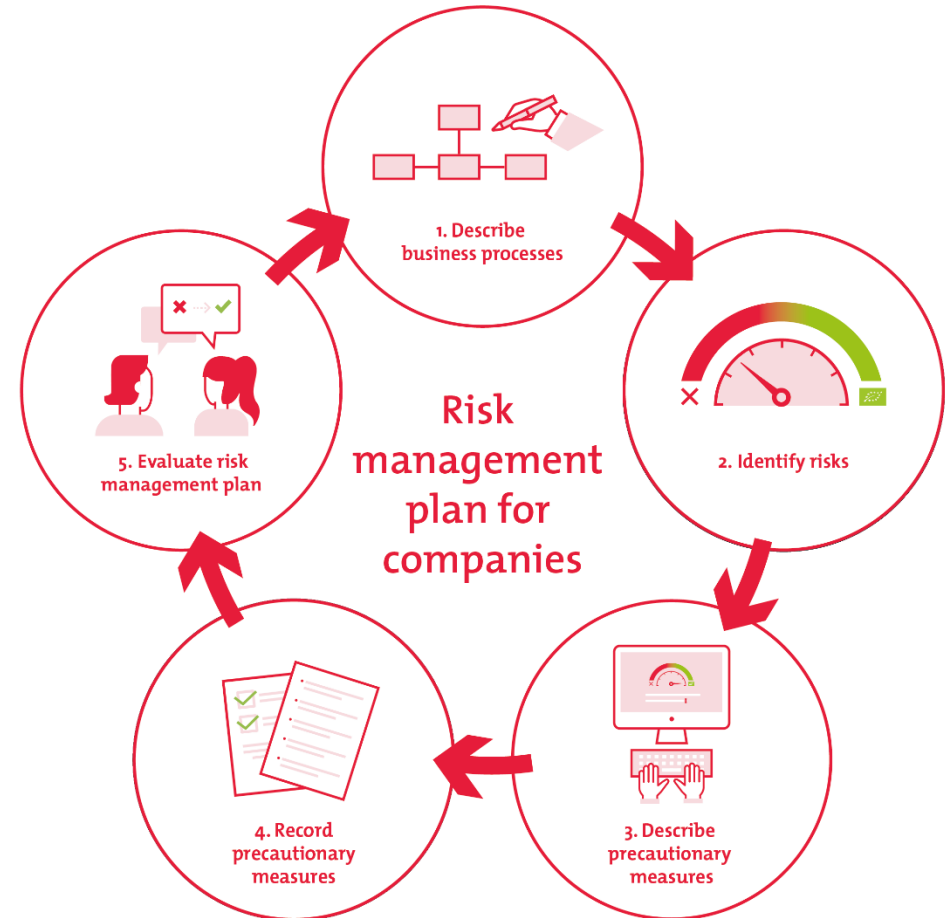

Imperfect co-ordination

- Electronic certificates in TRACES combined with e-seal
- OP certificates in EU since 1 January 2023 *IMPROVEMENT*
- OP certificates in TCs coming after 1 January 2025
  
- Opportunities for development:
  - Use of data

# Challenges & Opportunities

- Riskmanagement plan article 28.1

## Challenges & Opportunities

- Procedure by operator in case of suspicion and residues of unauthorized substances article 28.2
- Official investigation article 29

# Big challenge: International trade – still to come from 1st January 2025

Equivalence

Compliance

- Re-assessment of CBs
- Re-negotiation of trade agreements
- Implementation of new regulation under compliance
  - Annex VI. For inputs authorized for use in TCs – after EGTOP assessment 1st substance to be included next year
  - Implementation of new group certification rules – more harmonization

**Thank you for your attention!**
